

平成30年度 大学院特別セミナー

Neuroimmunology update

神経免疫学のトピック

Presented by Sachiko Miyake, MD, PhD

Department of Immunology

Juntendo University Graduate School of Medicine

順天堂大学医学部免疫学講座 教授 三宅幸子先生

2018年 6月 4日(月) 17:00~18:30

薬学部研究棟7階 セミナー室(8)

Central nervous system (CNS) was thought to be an immune privileged site. Recently, however, the discovery of lymph systems in CNS has attracted much attention. Furthermore, the roles of myeloid cells such as microglia and macrophages in the homeostasis as well as inflammation of CNS have emerged as important research topics. In this class, these topics will be overviewed. In addition, our recent findings to show the interaction of gut environment and CNS inflammation will be presented and discussed.

本セミナーは大学院単位認定の対象となります
